- Canvas

- make strip by single user (no edit stage)
- edit square strip (store all layers of square)

- img
- layer 1 (border)
- layer 2 (stickers/bubbles)
- layer 3 (text)

- collaborative (possible moderator - can change square order) people can add to same strip

audio (voice, sound effects)

Tech

- Ionic vs. React Native
- Canvas / Img libraries
- Mongo vs. SQL
- Using phone library/camera
- Touch/drag/drop manipulation
- Sockets (sharing)
- Filter effects on images
- Img compression?
- File base

Project (Strip)

- title
- [users] (REF)
- [owner?]
- [square] (REF)
- order

Library/Add-ons

- type: bubbles, text panel, stickers, frames
- (size)
- source:

Filter

- enum [5 filters]

Layers

- [add ons] (REF)
- [coordinate]

Square

- owner
- original img + filtered & wrapped
- (filtered img)
- layer 1: filter?
- layer 2: borders
- layer 3: add-ons
- final img (if complete)
- thumbnail
